Eating locally ensures that farmland remains in farming by increasing the market for the food farmers grow and keeping food dollars in the community. Local food doesn't have to travel thousands of miles from farm to plate, cutting energy use substantially. Local food is the freshest, best tasting food around.

CSAs

CSAs offer an adventure in eating, your weekly share of food is filled with only what is ready for harvest at that time; be it summer berries or autumn squash. You can't get this kind of excitement from the grocery store!

Community Supported Agriculture (CSA) is the most direct way to support your local farmer and eat what they grow. Paying membership dues at the beginning of the Spring will entitle you to a weekly share of whatever the farmer harvests during the growing season. Sharing the risks by paying dues, means sharing the rewards in the form of fresh food every week. Each CSA is unique, some offer strictly vegetables and fruit, some offer eggs, meat, herbs and fresh cut flowers. Various CSAs offer pick up locations all over the Metro Area, and some even offer home delivery.

To find the local CSA that is right for you, browse the list below. If you live outside Montgomery County, visit www.localharvest.org to find a great CSA anywhere in the country.
